

Below is a summary of the anti-doping activities for the year that WTSF have completed.

It has been an extremely tough period due to much of the year either spent in lockdown or under restrictions due to the Covid-19 pandemic.

Clean Sport Education Strategy and Implementation Plan

2022 sees the introduction of our new anti-doping strategy. Our mission is to protect the integrity of our clean sport within WTSF and Sport Shooting in Wales

Our Education Strategy aims to target key anti-doping topics, in line with UKAD's clean sport curriculum in conjunction with our sport specific needs. These topics will cover. *principles and values of clean sport, strict liability, rights and responsibilities of athletes, coaches, and athlete support personnel, consequence of doping, anti-doping rule violations, the prohibited list, supplements, medications & TUE's, the testing process, testing pools and ADAMS, how to report doping, substances of abuse.*

Coaches and Athlete Support Personnel will also have specific education opportunities specific to their role relating to anti-doping with Squash Wales.

Education

At the end of 2021, all the WTSF High performance and pathway Athletes were made aware of the UKAD website and training materials. Due to Shooting not being held during B2022 we have not had the opportunity to complete the Clean Games education thus far. All Players, Coaches and Athlete Support Personnel received information regarding the prohibited list changes for 2022. The WTSF have worked in partnership with Sport Wales National Centre (SWNC) to reinforce key anti-doping messages around the facility.

Compliance

At the end of 2021 the WTSF is in progress and working to complete the UKAD's Assurance framework with 60% of evidence being accepted with 38% under review

Testing

The WTSF currently has no athletes on the whereabouts programme.
